THE POLITICS OF VIRTUAL REALITIES

How has technology changed our politics? Have those changes all been for the good? In this course, we will explore the political, legal, and normative implications of the Internet for liberal democracy. The first part of the course investigates the interplay between capitalism, technology, and democratic values. We will start by looking at the US Constitution, exploring arguments that the document cannot, by itself, prevent the Internet from becoming a domain of manipulation rather than of freedom. How can we uphold the ideals of liberty and equality? What impact has technology had on the marketplace of ideas and civic community? The second part of the course considers a wide range of cases that illuminate key issues in our study of the Internet’s contemporary impact on our politics. The third and final section revisits the themes with which the course began to reflect on the future of human freedom in the digital age. Special attention will be given to the potential tradeoff between what we want as consumers and what we need as citizens, as well as between privacy rights and national security, and the challenges of mediating international conflicts in cyberspace.

GOV94as will meet on Thursdays from 12:00-2:45 PM in the Hoffmann Seminar Room of the Minda de Gunzburg Center for European Studies. You will be expected to complete all of the assigned reading and reaction papers (more below) in timely fashion, and to come to each meeting prepared to be an active participant. Each week, you will be given some study questions in advance to guide your reading and preparation.

Though it assumes no prior knowledge, the course surveys a great deal of material rapidly. Should you find yourself wanting greater background on a particular issue than the required readings provide, you are encouraged to see me for suggestions.

Course Requirements:

- A 5-7 page paper on a topic to be handed out on Thursday, February 20. The paper will be due in my CES mailbox by 4:00 PM, on Monday, March 2. It will be based entirely on readings already assigned for class and no additional reading will be required. (20% of course grade)

- A 5-7 page paper on a topic to be handed out on Thursday, April 2. The paper will be due in my CES mailbox by 4:00 PM, on Monday, April 13. Again, it will be based entirely on readings already assigned for class and no additional reading will be required. (20% of course grade)

- A 10-12 page final paper on a mutually agreed upon topic due on Wednesday, May 6. You must submit a prospectus for your final paper and have it approved by me on or before Thursday, April 16. (30% of course grade)
• Active participation in the course. To assist you in this realm, all students will be required to submit electronically a reaction paper on each day's assigned readings. Reaction papers will be due by midnight the day before the class in question meets, since I will want to read them before our meeting to help me to shape our discussion that day. Your performance on these informal papers will be factored into your final participation grade. In some weeks, we will substitute other activities for the regular reaction papers. These exercises will also be factored into your participation grade. The participation grades will not be curved. Nothing would make me happier than to witness you all earn A's in this category. But that is up to you. (30% of course grade).

A word of caution: One-third of a grade (e.g. from B+ to B) will be deducted for each day a paper is late. Only a note from the Health Center will waive this penalty. Fairness mandates that no exceptions be made.

Collaboration: Discussion and the exchange of ideas are essential to academic work. For written assignments in this course, you are encouraged to engage with your classmates and to share thoughts and sources. The questions are designed to make you think, and trying out your preliminary ideas on someone is a good way to focus your argument. That collaboration should end, however, where your writing begins. Please be sure to properly cite any books, articles, websites, lectures, etc. that have helped you with your work. If you get feedback on drafts along the way, you should acknowledge this assistance.

Office Hours:

   Thursdays, 3-5 PM
   or by appointment

GOV 94as Web Page: With the exception of books for purchase, all the materials for this course can be accessed through the GOV94as Canvas site. You will note below that some of your assigned materials are only available electronically.

Course Readings: Required readings available for purchase at the Coop and elsewhere are listed below. There will also be additional readings to access electronically via the hyperlinks in this syllabus or the Canvas course website. These latter readings are marked with an asterisk [*] in the syllabus.

The Constitution and Declaration of Independence (will be handed out in class)
